COATING APPLIED IN

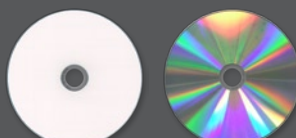

U.S.A.

UltraPrint™ Everest Printable Media

We are passionate about Everest Printing, which is why we spent nearly a year perfecting UltraPrint™ - the ultimate coating process for Everest Printable CD and DVD media. This unique dual layer system provides optimal image adhesion with perfect edge retention ... everytime ... guaranteed. UltraPrint™ coating is applied to duplication grade A media here at our in Chardon, OH facility to exacting specifications. That media is specifically selected for premium recordability as well as physical characteristics such as smooth OD/ID edges for reliable transport through the Everest robotics. This attention to detail results in a disc that not only looks great, but saves you money through fewer misprints, fewer failed writes, and fewer misfeeds resulting in increased machine uptime/throughput. UltraPrint™ media is the most economical media available today for your Everest printer which is why it is the #1 choice for some of America's top duplication companies.

UltraPrint™ media is available in a wide variety of styles and formats to meet your specific applications:

UltraPrint™	UltraPrint-M™	UltraPrint-D™
